New products of Synthopol

Synthalat QTL 3199 **Thixotropic long-oil Alkyd Resin**

Synthalat QTL 3199 is a new development which supplements our well-known long-oil Alkyd Resins.

◆ **Synthalat QTL 3199 - Properties and technical data**

- ◆ Oil content: approx. 63 % of (low yellowing) vegetable fatty acids
- ◆ Supplied as: 80 % in low aromatic white spirit ("D60")
- ◆ Non-volatile content (nvc) (as supplied) 80 +/- 1 %
- ◆ Acid value (in mg KOH / g) (relative to nvc) max. 10
- ◆ Colour value (iodine) (as supplied) max. 10

◆ **Use**

Synthalat QTL 3199 can be used to alter the rheological properties of wood stains and decorative paints, i.e., the manufacture of products such as "wood gels" or "non-drip" decorative paints. **Synthalat QTL 3199** can be used with cobalt containing driers as well as with cobalt-free driers.

◆ **Contact**

Synthalat QTL 3199 is already in the phase of up-scaling. Therefore, samples are available on the short-term. If you are interested or if you require further information (e.g. starting formulations) please refer to your established contact persons in our sales and R&D departments. Or contact us via ++49(0)4161-7071-0 and info@synthopol.com
