European Coatings Show 2015, 21–23 April 2015, Nuremberg (Germany)

Synthopol Chemie – New products at the ECS 2015

Buxtehude, 16 March 2015 – As a specialist in synthetic resins, we are delighted to have the opportunity to present a range of innovative products to you at the European Coatings Show (ECS 15, 21–23 April 2015). These include:

- For the pigmented application area, a radiation-cured, tin-free UV dispersion (**Syntholux BW 2132**) with impressive matting properties and resistance to chemicals
- For wood gels or non-drip decorative paints, a thixotropic long-oil alkyd resin (**Synthalat QTL 3199**)
- For wood and plastic surface varnishing, a polyurethane dispersion that forms films without the addition of solvents at room temperature (**Liopur PFL 3046**)

Perhaps the most interesting new product is the water-dilutable, polyester-modified acrylate resin **Synthalat WA TH 2598** with only 2.0% OH content, which we recommend for single and two-component top coats and single-coat paints with very good adhesion to metal, plastic, wood and glass.

This is just a small selection of fascinating new synthetic resins – made in Germany. Visit us at the ECS in **Hall 7 Stand 367** – we will be happy to help you and present our new products to you in person. ^{ABP}

About Synthopol

Synthopol Chemie, headquartered in Buxtehude near Hamburg, is one of Europe's leading producers of synthetic resins, generating annual sales of well over 100 million euros. In over 55 years, SYNTHOPOL has developed comprehensive specialist know-how and an impressive depth of experience in the field of synthetic resins – whether for coatings, for adhesives or for the construction industry. The company's wide range of products includes acrylate resins, alkyd resins, dispersions, can and coil coating resins, saturated and unsaturated polyester resins.

Thanks to its long-standing employees, Synthopol Chemie is able to guarantee unrivalled continuity in quality as well as in its personal interactions with its customers. Synthopol is both partner and advisor to its customers and works with them to develop tailor-made solutions for market-compliant and successful products. Product innovations – made in Germany.

The success of Synthopol Chemie is built on the competence, commitment and flexibility of our staff, innovative product developments and state-of-the-art facilities featuring the latest technologies. We make substantial investments every year in the fields of production engineering, research and development, data processing and environmental protection.

Synthopol creates substantial connections with nationally and internationally operating customers.
